~~LIGHTS DOWN~~

INT. PERATYN SYSTEMS LOBBY - DAY

Rob, Jonathan, and Borland enter.

ROB

Don't worry about the power blips. All critical systems run off a central uninterruptable power supply, with a ~~diesel~~ generator behind that.

JONATHAN

Then why did the lights go out?

ROB

They're not critical.

Jonathan looks offstage.

JONATHAN

What's down there?

ROB

The Dark Wireless lab. Skunkworks projects headed by Kiesler Markey, one of our founders. They also manage comm and telemetry for the SpaceY space platform.

BORLAND

Any chance for an "E" ticket ride?

ROB

Not at your clearance level. A few of us have access, and one of the founders has been to the platform.

Do you even know what an "E" ticket is?

BORLAND

Best. Ride. Ever.
